

hydraulic steelsqueez tool

description

The hydraulic steelsqueez is one of our most popular tools. Durable, compact and powerful, it is designed so that its 10,000 psi will squeeze-off Schedule 40 steel pipe in emergency situations. The swing-out, lower jaw design enables the tool to be used in tight trenches, resulting in faster and safer shut-offs, less trenching, fewer man-hours and lower costs.

features

- ★ Units operate hydraulically and are designed for schedule 40 pipe.
- ★ More than adequate pressure is available for any pipe within the model range.
- ★ Specially designed squeeze bar and machined stops protect against over squeezing.
- ★ Special Swing Latch design for easy usage in smaller trenches.
- ★ 20 foot hydraulic hoses allow operation from outside the excavation for added safety or where access is limited.
- ★ Superior tools at an extraordinary price.
- ★ Limited three-year warranty.

specifications

Item	Size	Weight (pounds/kg)
SLS-1A	3/4 inch thru 1 1/4 inch	28 pounds/12.7 kg
